## Education

---

### Seattle University

Masters of Science in Computer Science  
Graduated Summa Cum Laude

Seattle, WA  
2021-2023

### University of Washington

Bachelor of Arts in Mathematics

Seattle, WA  
2016-2018

## Experience

---

### Senior Software Engineer

Tenvos San Jose, CA  
Oct 2023-Present

- Spearheaded mobile application development from inception, delivering cross-platform React Native solution with exceptional UX.
- Engineered end-to-end full-stack solution leveraging Django REST APIs and React Native, seamlessly integrating MySQL backend.
- Architected enterprise-grade database infrastructure with optimized stored procedures, driving scalable performance.
- Integrated biometric speaker verification system, strengthening security protocols and user authentication.
- Deployed production-ready ML microservice for predictive fatigue analysis, enhancing operational intelligence.
- Built dashboards delivering real-time fatigue monitoring with automated alerts, enabling proactive workforce wellness management.

### Software Engineer

FreeDoc Seattle, WA  
Sept 2023-June 2025

- Orchestrated digital transformation initiatives, migrating enterprise clients from legacy physical systems to cloud-based platforms.
- Designed workflow automation and business process optimization, maximizing operational efficiency and ROI.
- Cultivated strategic client partnerships through consultative relationship management, driving retention and revenue growth.

### Software Engineer

Globys, Inc Seattle, WA  
June 2019-Aug 2021

- Designed and built data migration program for new client onboarding.
- Produced new stored procedures and improved existing stored procedures performance and edge cases handling (SQL).
- Investigated, diagnosed, and resolved sustaining bugs reported by clients, ensuring stability of the software.
- Collaborated closely with stakeholders and clients, fostering clear communication using Agile methodology, and facilitating tradeoffs for successful project outcomes.
